## Research Fellowships

Applications for Research Fellowships at Delft University of Technology are invited from graduate students with a master's degree in engineering or science who have at least either one additional year of experience in research, or from graduate students who have completed their Ph.D. work. The successful candidates will receive a monthly allowance of D.fl 1500 during a twelve-month period (provided they do not at the same time receive other allowances) and are expected to carry out full-time research in one of the University Laboratories. A working knowledge of the Dutch language is not required, but proficiency in English, German or French is a prerequisite. In special cases, an extension of the Fellowship beyond a twelve-month period can be considered.

The fields of research in the University related to these fellowships for the years 1969 and 1970 are:

Preparatory work for nuclear demagnetization experiments; some special applications of EPR, NMR and ENDOR techniques in solids at low temperature; Measurement of nuclear magnetic relaxation times in liquids and/or solids; Experimental determination of group constants in fast and thermal neutron spectra; Theory and experiments in relation to burn-up in fast and thermal nuclear reactors; System and control engineering (in particular dynamic optimization, pattern recognition, hybrid computing techniques); Studies of the Mössbauer effect in solid-state physics; Thermal and subthermal neutron scattering studies in solids and liquids; Unit operations of polymer processing (viscous flow, heat transfer, spinning of fibres, coating, melting).

Applications should be addressed to: Chairman of the Fellowship Committee, Delft University of Technology, Julianalaan 134, Delft, The Netherlands. Applicants should submit a brief summary of their graduate and undergraduate training, their major field of interest and a list of their reports or publications. They are further asked to submit the names and addresses of three persons familiar with their work and abilities. Further details can be obtained from the Chairman of the Fellowship Committee.
