

Recommendations from Conference Committee

The EPS Conference Committee with G.H. Stafford, Rutherford Laboratory, as Chairman has been very active since its foundation. It has approved so far the programmes of nine Conferences and Summer-schools organized by EPS Divisions and granted sponsorship to fourteen Conferences satisfying the criteria as laid down in February by the EPS Council (see Meetings Issue 1, Spring 1970).

Europhysics Conferences

A study group had been formed consisting of W. Buckel, Karlsruhe, J. Friedel, Orsay, and N. Kurti, Oxford, to define specific criteria applicable to Europhysics Conferences. It must be emphasized that «Europhysics Conference» is not just a convenient shorthand notation for any EPS meeting, but is reserved for conferences along the lines of the famous U.S. Gordon Conferences and satisfying the criteria proposed by the study group and accepted with a few modifications by the Conference Committee at its meeting on 25 September 1970. The version as given below will be submitted to the Executive Committee and the Council for approval.

1. General

Europhysics Conferences should follow broadly the philosophy and organization of the U.S. Gordon Conferences, i.e.

The subject of each conference should be well-defined and of topical interest.

The number of participants should preferably not exceed 70, and 100 should be regarded as a limit. The number of participants from any single country should not exceed one third of the total.

Attendance should be by invitation only (see Section 3).

Europhysics Conferences should be held, as far as possible, in secluded places, away from the distractions of large towns, but with facilities for outdoor recreation. Holiday and sporting resorts out of season, boarding schools and colleges during vacations are obvious possibilities.

These conferences should normally last at least three full days, preferably four to five days, though intensive one-day seminars might be acceptable.

Long (45–60 minute) introductory papers should be given by specially invited speakers or discussion leaders.

Ample time should be provided for informal personal exchanges and discussion in small groups. For example, there may be a morning session centred round two introductory talks, an after-dinner session with one introductory talk, while the afternoon is kept free for recreation and informal discussions.

There should be no published proceedings of the conferences, unless the participants agree otherwise.

2. Organization

This should be in the hands of at least two people from different countries, one of them preferably a resident in the country where the conference is held. The organizers will be jointly responsible for:

- drawing up the detailed programme
- choosing and inviting the discussion leaders and the other participants
- finance and the local arrangements.

They should submit a report to the EPS Conference Committee.

3. The Participants

Since the Europhysics Conferences are intended to be study conferences rather than «schools», participants should be chosen mainly from among those who are actively working in the particular field. Many of the participants will be selected by the organizers from among those who have applied to attend. For this selection to be comprehensive, it would seem necessary to advertise the dates and topics of the various Europhysics Conferences well ahead. This could be done by listing them separately in Europhysics News, in the Physics Bulletin of the IPPS, Bulletin de la Société Française de Physique, and other national or international physics periodicals, e.g. Physics Today.

As stated above, a total attendance figure of 100 is to be regarded as the maximum with about 70 as a desirable aim.

4. Finance

Each Europhysics Conference should be self-supporting. Since it is expected that discussion leaders will not have to pay for their board and lodging and that in most cases their travelling expenses will also be borne by the conference, other participants will have to pay a more than nominal registration fee. A figure of between Sw. Frs. 400 and Sw. Frs. 500 comprising registration fee, board and lodging, may be regarded as a guide for a five day conference.

Since it is not possible to budget exactly, some conferences may show a slight profit, others a slight

loss, and it would be advisable to establish a special Europhysics Conference Fund. This could be administered by EPS Headquarters in Geneva but should constitute a separate account. Any surplus from conferences and donations for the general purpose of Europhysics Conferences should be paid into that account which, in turn, could pay out subsidies if necessary and — more important — provide a financial guarantee. It is expected that organizers will try to get financial help from their own industry and government.

5. Initiation and Approval of Conferences

Most Europhysics Conferences will be proposed by the various Divisions of EPS although individual physicists may also suggest topics, especially in fields not properly covered by the Divisions. All Europhysics Conferences should be approved by the Conference Committee but this could be done by letter without having to wait for a committee meeting. A subcommittee will assist the Chairman by examining the proposals, ensuring that there is no overlap in time or duplication in subject among the Europhysics Conferences themselves or with other meetings, and by checking that the conditions laid down in Section 1 are fulfilled. This subcommittee could also keep an eye on the finances and ensure that all national societies are fully informed about Europhysics Conference activities.

The Conference Committee proposed that W. Buckel, J. Friedel and N. Kurti act as subcommittee as proposed in Section 5 above. All correspondence concerning approval and sponsorship of conferences should be addressed to:

or to Dr. L. Etienne, at the above address.

Guide to Entries

In this Meetings Issue of Europhysics News, details are given of all future meetings about which notification has been received up to the end of November 1970. The events are arranged in date order, with summer-schools being listed separately. The meetings **organized by Divisions of the EPS** are printed in bold type and boxed; those **sponsored by the EPS** are printed in bold type. **Europhysics Conferences** are indicated by a star following the date.

In general, meetings are open to any applicants: where attendance is known to be restricted to invited applicants this is indicated accordingly.
