Member Societies

Recent information indicates that membership in National Societies affiliated to the EPS has increased by about 10 % since last year.

The **Polish Physical Society** (Polskie Towarzystwo Fizyczne) has been accepted by Council as a Member according to Article 4 b of the Constitution as from 1 January 1972.

M. Soutif has been appointed President of the **French Physical Society** in succession to J. Friedel.

W. Buckel has been appointed President of the **German Physical Society** (DPG) in succession to K.E. Ganzhorn.

Divisions

The **Atomic Physics Division** held its first meeting in July at Reading, UK, and elected H. van Regemorter, Chairman, and G.W. Series, Secretary of the Division.

The **Condensed Matter Division** held the First European Conference on the Physics of Condensed Matter at Florence in September (see report on pp. 1-2 of this issue). A. Guinier was appointed as new Chairman of the Division.

New Information Booklet

A new edition of the EPS Information Booklet is in preparation. It will contain full details of the Society and up-to-date addresses of Members.

The University of Basel announces a vacancy for a German speaking
FULL PROFESSOR IN THEORETICAL PHYSICS OF CONDENSED MATTER

Candidates should have demonstrated research competence in theoretical solid state physics. It is expected that the applicant will be interested in the experimental work of the solid state group and participate in the activities of the Theoretical Institute.

The candidate should teach solid state physics, introductory and advanced courses in theoretical physics. Research with other groups of the Physics Department will be encouraged.

Applications, including curriculum vitae and a list of the most important publications, should be submitted by December 31, 1971, to : The Dean, Faculty of Natural Sciences, Bernoullistrasse 32, CH-4000 Basel, Switzerland.

The University of Basel announces a vacancy for a German speaking
FULL PROFESSOR IN EXPERIMENTAL PHYSICS OF CONDENSED MATTER

Candidates should have demonstrated experimental research competence in the fields of phase transformations or the amorphous and liquid state.

Applicants should have an active interest and experience in teaching solid state physics and introductory physics courses as well as have appropriate administrative experience.

It is expected that the candidate will teach and conduct research in collaboration with other groups in the Physics Department.

Applications, including curriculum vitae and a list of the most important publications, should be submitted by December 31, 1971, to : The Dean, Faculty of Natural Sciences, Bernoullistrasse 32, CH-4000 Basel, Switzerland.
