### PRINCIPAL SUBJECT

Accelerator mass spectroscopy for single atom counting, **15**,2,1

Applied Physics, Physics in Industry

- Chemical vapour deposition, laser-induced, **14**, 10,9
- at Condensed Matter Conf. (Berlin-West 1985), **16**,5,9
- GEC, long-range research at, **14**,5,5
- Hydrogen production by water electrolysis, **12**,8/9,9
- Laser applications, **12**,7,10; **14**,10,9
- Microemulsions, amphiphiles, micelles, **16**,6,9
- Optical fibre technology at STL, **16**,11/12,4
- University — industry interaction, **14**,8/9,8

APS (American Phys. Soc.), collaboration with, **16**,11/12,20

Associate Members, EPS: see EPS ...

Astronomy, Astrophysics (see also Solar Physics)

- Atomic processes in, **16**,1,12
- Atoms in highly ionized states, **12**,1,1
- Cosmic rays, what are they made of?, **15**,2,12
- ESO new technology telescope, **13**,12,12
- Extragalactic distance scale, Hubble constant, **15**,11/12,10
- Gamma-ray astronomy beyond COS-B mission, **13**,7,1
- Inflationary Universe, **16**,9,6
- Neutrinos in cosmology, **14**,7,1
- Neutron stars, **12**,1,5
- Nobel Prize in Physics 1983, **14**,12,5
- Primordial helium, **12**,8/9,7
- Solar and stellar magnetic fields, **13**,12,6
- SS 433: new extraordinary object, **12**,4,8
- Supernovae and their progenitors, **16**,7/8,5
- Volcanism of Io, **12**,10,9
- 7th European Regional Astronomy Meeting (Florence 1983), **15**,4,8

Atomic and Molecular Physics

- in Collisions, **12**,1,3; **16**,1,6
- Dimer spectroscopy and vibrational predissociation, **16**,1,9
- an Exciting field of many facets, **16**,1,1
- Heavy atoms, parity non-conservation in, **16**,2,1
- Ion-atom collision theory, **16**,1,6
- Molecular beams, European Who's Who, **15**,11/12,16
- – Multiphoton dissociation in, **16**,1,2
- Molecular systems, theory of resonances in, **16**,2,4
- *Special Issue*, **16**,1
- Structure of matter, research in Italy on, **13**,4,8
- 1st European Conf. of Atomic Phys. Division 1981, **12**,7,15

Atomic Spectroscopy

- EGAS meeting, Liège 1982, **14**,4,11
- – Madrid 1983, **15**,4,16
- Gamma-ray internal conversion for, **15**,4,11

Atoms in highly ionized states, **12**,1,1

Barkhausen: physicist and pioneer, **12**,12,10

BESSY, surface physics at, **15**,6,1

Biophysics, Medical Sciences

- Biological tissue characterisation by ultrasound, **15**,8/9,12
- Biomagnetism, **15**,7,11
- Lasers in biology and medicine, **12**,7,14
- NMR tomography, **15**,5,10
- from Photon to neuronal signal, **16**,5,1

Boundary and Interior Layers, BAIL Conf. Dublin 1982, **13**,12,6

Career outlook for physicists in Europe, **12**,12,8

CERN

- ISOLDE experiments, **12**,4,1
- LEAR experiments, **15**,7,5
- LEP ground-breaking ceremony, **14**,10,12
- Proton-antiproton collider experiments, **14**,10,1

Computational Physics

- Boundary and interior layers (BAIL), **13**,12,6
- Computations in plasma physics, **12**,12,4
- EPS Group activities, **12**,12,11
- New developments, **12**,1,11

Condensed Matter Physics (see also Solid State Physics)

- Amphiphiles, micelles, microemulsions, **16**,6,9
- EPS Division applauds 1985 Nobel Prize, **16**,11/12,3
- EPS Division, General Conference
- – 5th Berlin-West 1985, **16**,1,16; **16**,5,8; **16**,5,9
- – 3rd Lausanne 1983, **14**,7,6
- – 2nd Manchester 1982, **13**,2,12; **13**,5,4
- EPS Division, Liquids Section, **15**,7,16
- Graphite intercalation compounds, **16**,11/12,16
- Itinerant electron magnetism, **14**,7,7
- Localization and interactions of electrons, **14**,7,6
- Materials science experiments under microgravity, **16**,7/8,14
- Molecular and atomic hydrogen under extreme conditions, **13**,8/9,4

- (Condensed Matter Physics)
- Neutron spin echo spectroscopy, **16,4,1**
  - Nuclear methods in, **16,4,9**
  - in One dimension, **12,2,10**
  - Phase transitions, diffraction studies, marginal dimensionality, **16,9,1**
  - – Nobel Prize in Physics 1982, **14,2,7**
  - Semiconductor –
  - – Deep levels, **14,7,9**
  - – Films, MBE grown, surface studies of, **16,4,12**
  - – Structures, localisation, interaction effects in, **16,7/8,1**
  - Structure of matter research in Italy, **13,4,8**
- Constitution and By-laws, EPS: see EPS ...
- Cosmic Rays: What are they made of? **15,2,12**
- Cosmology: see Astronomy ...
- Council, EPS: see EPS ...
- Crystals
- Incommensurate, **13,12,1**
  - Polymer, structure and morphology, **13,12,10**
- Data bases: searching for data, **12,4,6**
- Data communications in high energy physics, **14,2,4**
- Data storage: optical, on discs, **12,7,11**
- Denmark: steady state of physics in, **16,5,15**
- Developing Countries
- of Europe, problems of physics in, **12,10,11**
  - Physics teaching in, **14,8/9,9**
  - Third-World Academy of Sciences, **15,2,15**
- Diffusion, deterministic: a chaotic phenomenon, **15,5,5**
- EGAS meeting, Liège 1982, **14,4,11**
- Madrid 1983, **15,4,16**
- Electronic and Atomic Collisions
- Atomic and molecular collision physics, **12,1,3**
  - Energetic ion-atom collisions, theory of, **16,1,6**
- Electrons
- Localization and interactions, **14,7,6**
  - One-electron problem, new methods for, **12,5,4**
  - and Positrons, channelled, radiation of, **12,12,1**
  - Relativistic, coherent radiation from, **16,7/8,10**
  - Spin-polarized, **14,2,9**
- EPS Associate Members
- BESSY, **15,6,1**
  - CERN
  - – ISOLDE experiments, **12,4,1**
  - – LEAR experiments, **15,7,5**
  - – LEP ground-breaking ceremony, **14,10,12**
  - – Proton-antiproton collider experiments, **14,10,1**
  - GEC, long-range research at, **14,5,5**
  - Geneva meeting 1982, **13,12,11**
  - JET
  - – in August 1984, **15,8/9,7**
  - – Opening ceremony, **15,5,16**
  - – Scientific programme, **14,4,3**
  - STL, Optical fibre technology at, **16,11/12,4**
  - Winterthur meeting 1984, **15,5,14**
- EPS Constitution and By-laws, revision of, **12,12,12; 13,4,12; 13,12,12; 14,4,12; 15,4,2; 16,4,16**
- EPS Council
- Berlin-West 1985, **16,4,15; 16,5,5**
  - Copenhagen 1983, **14,4,1**
  - Geneva 1982, **13,5,1**
  - Grenoble 1981, **12,4,12; 12,5,1**
  - Istanbul 1981, **12,10,3**
  - Prague 1984, **15,8/9,1**
  - Winterthur 1984, **15,4,1**
- EPS Executive Comm. statement on nuclear arms, **13,7,12**
- EPS General Conference
- 5th (Istanbul 1981), **12,1,1; 12,10,1**
  - 6th (Prague 1984), **14,12,1; 14,6,1; 15,8/9,1; 16,5,16**
- EPS General Meeting of Members, **12,10,4; 15,8/9,2**
- EPS Lecturer
- 1982 (I.F. Silvera), **13,4,12; 13,8/9,4**
  - 1984 (P.T. Matthews), **15,4,3**
  - 1985/6 (H. Haken), **16,9,16**
- EPS Letters Journal: see *Europhysics Letters*
- EPS President
- J. Friedel, message, **13,4,1**
  - A.R. Mackintosh: rendez-vous Istanbul, **12,1,1**
  - – State of EPS, **12,8/9,1**
  - G.H. Stafford, message, **15,5,1; 15,8/9,2**
- EPS Teaching abroad scheme, **13,2,7; 13,8/9,11; 15,6,12**
- Euler, 1707-1783, **14,10,6**
- European Communities, R,D and D support by, **14,12,7**
- European Geophysical Society, **15,2,15**
- European Incoherent Scatter (EISCAT) Project, inauguration, **12,10,5**
- European Physical Society: see EPS ...
- Europhysics Letters*, **16,2,3; 16,6,1; 16,11/12,20**
- Fundamental constants and SI units, **15,7,8**
- Galileo, Nobel and the Z<sup>0</sup>, **14,7,3**
- Gamma-ray internal conversion, applications, **15,4,11**
- GEC, long-range research at, **14,5,5**
- Heavy Ions
- in Collisions, **12,1,6; 16,1,6**
  - Reactions, **15,1,10**
- Hewlett-Packard Europhysics Prize
- 1980: O.K. Andersen, **12,5,4**
  - 1982: K. von Klitzing, **13,4,2**
  - 1983: I. Silvera, **14,2,12**
  - 1984: G. Binnig, H. Rohrer, **15,2,16; 15,5,16**
  - 1985: J. Als-Nielsen, M. Pepper, **16,1,16; 16,4,11; 16,7/8,1; 16,9,1**
- High Energy and Particle Physics
- Big detectors using BGO, **16,2,8**
  - Broken symmetries, **12,2,1**
  - Data communications in, **14,2,4**
  - Intermediate vector bosons, **14,10,1**
  - ISOLDE experiments, **12,4,1**
  - LEAR experiments, **15,7,5**
  - LEP ground breaking ceremony, **14,10,12**
  - Muons as probes in solids, **16,2,11**
  - Nobel Prize in Physics 1980, **12,2,1**
  - – 1984, **15,11/12,1**
  - Parity non-conservation in heavy atoms, **16,2,1**
  - Proton-antiproton collider experiments, **14,10,1**
  - Three-nucleon force, **15,2,5**
  - Where do we stand?, **12,2,4**
  - Where is it going?, **13,10,4**
- Histories of science, **14,7,4**
- Hydrogen production by water-electrolysis, **12,8/9,9**
- Iceland, physics in, **16,6,15**
- ICFA (Int. Comm. for Future Accelerators), **16,6,13**
- International Facilities for Physics Research, **14,8/9,9**
- ISOLDE experiments at CERN, **12,4,1**
- Isotopes
- Anomalies in solar system, **14,2,1**
  - ISOLDE experiments, **12,4,1**
  - Separation by lasers, **12,7,5**
- Italy, research on structure of matter in, **13,4,8**
- Japan Physical Society, collaboration with, **16,9,16**
- JET
- in August 1984, **15,8/9,7**
  - Official opening, **15,5,16**
  - Scientific programme, **14,4,3**
- Lasers
- Biological and medical applications, **12,7,14**
  - Chemical vapour deposition induced by, **14,10,9**
  - Dye, in quantum electronics, **13,10,10**
  - Free-electron, **13,4,5; 16,7/8,10**
  - Hollow-cathode, research on, **13,2,9**
  - Industrial applications, **12,7,10; 14,10,9**
  - Isotope separation by, **12,7,5**
  - Nobel Prize in Physics 1981, **13,2,6**
  - Optical storage on discs, **12,7,11**
  - Particle tracking by, **15,5,2**
  - Photochemistry applications, **12,7,4**
  - Physical principles, historical review, **12,7,1**
  - Plasma diagnostics, **12,7,12**
  - *Special Issue*, **12,7**
- LEAR experiments at CERN, **15,7,5**
- Letters to the Editor
- Database Guides (N.B. Butterwick), **12,4,7**
  - Parity violation predictions (M.A., C. Bouchiat, D.N. Stacey), **16,5,14**
  - Physics and culture (J.W.R. Fennema), **15,4,4**
- Low Temperature Physics
- Refrigeration to ultralow temperatures, **13,12,7**
- Macromolecular Physics
- Amphiphiles, micelles, microemulsions, **16,6,9**
  - Current problems, **14,8/9,1**
  - Polymer crystals (1982 Spain Conf.), **13,12,10**

- Magnetism**
- Itinerant-electron type, **14, 7,7**
  - Nijmegen high-field laboratory, **15, 11/12,13**
  - Permanent magnets, **13, 7,5**
  - Spin-glasses, **14, 12,2**
- Metal Physics**
- Cyclic plasticity in pure metals, **14, 1,2**
  - Heavy fermions, **16, 9,14**
  - Intermetallic compounds, hydrogen in, **14, 4,7**
  - Mechanical instabilities, **14, 12,10**
  - Metallic glasses, **14, 1,8**
  - Physical metallurgy, advances in, **14, 1,1**
  - *Special Issue*, **14, 1**
  - Superconductivity and metallurgy, **14, 1,6**
  - Superplasticity of metals, **14, 1,4**
  - Surfaces of metals, **14, 1,10**
- Microscope, scanning-tunnelling (Winterthur meeting 1984), 15, 5,14**
- Neutrinos in cosmology, 14, 7,1**
- Neutron spin-echo spectroscopy, 16, 4,1**
- Neutron stars, 12, 1,5**
- Nobel Prize in Physics**
- 1980: J.W. Cronin, V.L. Fitch, **12, 2,1**
  - 1981: N. Bloembergen, A. Schawlow, **13, 2,6**; K. Siegbahn, **13, 2,5**
  - 1982: K.G. Wilson, **14, 2,7**
  - 1983: S. Chandrasekhar, W.A. Fowler, **14, 12,5**
  - 1984: S. van der Meer, C. Rubbia, **15, 11/12,1**
  - 1985: K. von Klitzing, **16, 11/12,1**
- Nuclear magnetic resonance for tomography, 15, 5,10**
- Nuclear Physics**
- Atomic nucleus, short-range structure of nuclear matter, **14, 5,1**
  - Gamma-ray internal conversion, applications, **15, 4,11**
  - Heavy-ion collisions, **12, 1,6**; **16, 1,6**
  - Heavy-ion reactions, **15, 1,10**
  - Methods for condensed matter studies, **16, 4,9**
  - New concepts, challenges, **15, 1,1**
  - Nuclear stability, **14, 8/9,4**
  - Nuclei, rapidly rotating, **15, 1,5**
    - spin vibrations in, **15, 1,2**
    - supersymmetry in, **15, 1,8**
    - synthesis of, at limits of nuclear stability, **14, 8/9,4**
  - Pion as probe, **15, 1,14**
  - Radioactive ions, secondary beams of, **12, 4,1**
  - *Special Issue*, **15, 1**
  - Three-nucleon force, **15, 2,5**
  - in early 1930s, **13, 8/9,1**
- Obituaries**
- Sir John Adams, **15, 4,15**
  - P.A.M. Dirac, **15, 11/12,16**
  - P.L. Kapitza, **15, 5,8**
  - A. Kastler, **15, 4,14**
  - L.A.A. Thomas, **16, 2,16**
- Optical fibre technology at STL, 16, 11/12,4**
- Optical storage on discs, 12, 7,11**
- Optics, inverse problems in, 13, 5,6**
- Particle Accelerators**
- Accelerator mass spectrometry of radioisotopes, **15, 2,1**
  - ICFA (Int. Comm. for Future Accelerators), **16, 6,13**
  - Memories from childhood of, **15, 2,9**
  - for Single-atom counting, **15, 2,1**
- Physics Education**
- Helping developing countries, **12, 10,11**; **14, 8/9,9**
  - at Secondary school level, **12, 2,8**
  - Teaching abroad scheme, **13, 2,7**; **13, 8/9,11**; **15, 6,12**
  - in Turkey, **13, 8/9,11**
- Physics of the Ocean, 16, 11/12,13**
- Physics Research (see also Research in Europe)**
- in Denmark, **16, 5,15**
  - in Iceland, **16, 6,15**
  - International facilities for, **14, 8/9,9**
  - in Italy, on structure of matter, **13, 4,8**
  - Problems in Europe's developing countries, **12, 10,11**
  - in Turkey, **12, 8/9,2**
- Physics and Society**

- Superconductivity**
- and Metallurgy, **14, 1,6**
  - in Organic solids, **14, 5,7**
- Superfluid  $^3\text{He}$**
- Rotating, vortices in, **15, 6,13**
  - Ultrasonic spectroscopy of, **16, 9,9**

## Surfaces and Interfaces

- Structure investigation by He diffraction, **12, 10,6**
- Studies of MBE grown semiconductor films, **16, 4,12**
- Surface physics at BESSY, **15, 6,1**
- Surface reaction dynamics, **13, 5,9**
- Surface science, **13, 12,5**

Swiss Physical Society, changes in *Helv. Phys. Acta*, **13, 5,3**

## Synchrotron Radiation

- at BESSY, for surface physics, **15, 6,1**
- Relativistic electrons and coherent radiation, **16, 7,8,10**

## Thermonuclear Fusion

- JET, Official opening, **15, 5,16**
- – Scientific programme, **14, 4,3**
- Neutral injection heating in devices for, **16, 4,5**
- Reactor engineering problems, **16, 5,11**
- Reversed field pinch in magnetic fusion, **15, 4,5**

- RF driven currents in devices for, **15, 8,9,6**
- Stellarators, **13, 8,9,7**
- Tandem mirror approach to magnetic fusion, **12, 8,9,4**

Third-World Academy of Sciences, **15, 2,15**

Training and jobs for physics and engineering Ph.D.s, **13, 10,1**

Trends in Physics (EPS General Conf.)

- Istanbul 1981, **12, 1,1**; **12, 10,1**
- Prague 1984, **14, 6,1**; **14, 12,1**; **15, 8,9,3**; **16, 5,16**

Turbulence, self-organization of, **13, 2,1**

Turkey, Physics in, **12, 8,9,2**

- Teaching in, **13, 8,9,11**

## Ultrasound

- for Biological tissue characterisation, **15, 8,9,12**
- for Spectroscopy of superfluid <sup>3</sup>He, **16, 9,9**
