The Advisory Committees of the EPS have the responsibility for advising the Executive Committee on different matters related to physics or the Society itself. With the exception of the Finance Committee and the Committee for Scientific Freedom where the members are personally invited, the Committees consist of representatives of the EPS members (both group and individual) and also of the Divisions. The Associate Members are particularly represented on ACAPPI (those with an industrial background) and on the Publications Committee (publishers). The Chairmen of the Committees are invited to attend meetings of the Executive Committee and also of the Council.
