

Conferences, Schools and Programmes

In 1992, *Europhysics News* publishes two Meetings Issues: in March and November. Urgent up-datings can also be included in all issues in the form of advertisements charged at SFR 100.— per insertion.

The events listed here are those for which details were received at the EPS Secretariat before 6 March 1992. In general, all events interesting European physicists which take place from the beginning of April 1992 are cited. For events prior to that date readers are referred to the November 1991 issue.

The meetings are in date order divided into two categories — Conferences and Schools although the distinction between these two categories is not always evident. Europhysics Conferences, *i.e.* meetings organized by EPS, its Divisions and Sections, have titles printed in **bold** type and are

boxed. Events sponsored by EPS have all information printed in **bold** type; Europhysics Study Conferences have an **E** preceding the date; European Research Conferences in Physics organized in cooperation with the ESF, Strasbourg, are **boxed**.

For inclusion in the November 1992 issue, organizers should send details to the EPS Secretariat by 25 October 1992 at the latest. Even if full details are not yet available, the preliminary information should be given.

Entries are selected from a database compiled using information which is supplied by organizers and by EPS meetings correspondents. Partial listings of the complete database are available.

Application for sponsorship of a meeting should be made to the EPS Secretariat.

Key to Abbreviations

- A: Application deadline
 Ab: Abstracts deadline
 inv.: restricted to invited applicants
 NP: no proceedings will be published
 P: Papers deadline (information on proceedings has not been received)
 PP: proceedings will be published (papers deadline).
 +: country (area) tel. / fax
 email - bitnet address or other

The information is given in this order:

Date **Venue**

University of Zürich, Physics Department

Professor in Condensed Matter Physics

The Physics Department is seeking a candidate for a faculty position as full professor in experimental condensed matter physics. The position will be available in fall 1993.

Applications are invited from physicists with an outstanding international research reputation. The successful candidate is expected to start a new research programme in an active and innovative field in condensed matter physics. Topics like "laser physics", "surface physics" or "complex systems" are particularly welcome. Interactions with the existing activities of the NMR, ESR and μ SR groups are possible.

The candidate is encouraged to continue the collaboration of the Physics Department with the IBM Research Center in Rüschlikon, the Paul Scherrer Institute (PSI) and various institutes of the University of Zürich and the Institute of Technology (ETH) in Zürich.

Beside research, the applicant is expected to share with his colleagues the duties of teaching and guiding courses in experimental physics at all levels.

Please send your application including curriculum vitae, list of publications, proposed research activities and three references to the following address to arrive before **15 June 1992**:

Dekan des Philosophischen Fakultät II, Universität Zürich,
