

Executive Committee

The EPS executive comprises the Executive Committee (EC) and task forces or working groups reporting to the EC. The EC, the Society's main executive instrument, is elected for one year by the EPS Council (normally from the Council's own members) and reports to the Council. It usually consists of 11 members who serve for no more than five consecutive years, except that a President-elect elected in the fifth year may serve as President for the two following years. There is at present one vacancy which will be filled at the next Council. The President remains in office for two years and the President-elect is a candidate for President. The President-elect is elected one year before the election for President. Action Committees are appointed by the EC to advise and assist it in its work.

Over 70 000 physicists in 36 countries support EPS either directly or as members of national physical societies.

National Society Members

Individual members of a national society which is a member of EPS (*i.e.*, a National Member Society) may participate in the activities of EPS as National Society Members by notifying the EPS Secretariat through their national society.

Individual Ordinary Members

- Individuals not belonging to an EPS National Member Society: 116.- SFR/a
- Individuals belonging to an EPS National Member Society: 58.- SFR/a
- Individuals belonging to an EPS Collaborating Society: 72.50 SFR/a

Fees: Swiss Bank Corp., CP, CH-1211 Geneva; Acc. No. 164.899
Swiss Post Office; Acc. No. 12-19107-4 CCP Geneva
German Post Office; Acc. No. 1801-30-754 Postbank Karlsruhe

Council

Council is the governing body of EPS. Delegates serve for up to four years and can be re-elected after three years have lapsed. They are elected by Individual Ordinary Members and Associate Members (each with four delegates having three votes), by National Member Societies (each with one delegate having 1-5 votes depending on the number of members), and by Divisions and Interdivisional Groups (each with one delegate having 1-7 votes depending on the number of members). IOM and Associate Member delegates are elected by a ballot of members following calls for nominations. Council has the powers empowered by the General Meeting of EPS Members (the Society's highest authority) and meets at least once each year:

- 1996: 22-23 March, Lisbon
- 1997: 21-22 March, The Netherlands
- 1998: 27-28 March
- 1999: 26-27 March

• Mobility Committee

The Mobility Committee manages the *European Mobility Scheme for Physics Students* (EMSPS) which covers all university-level institutions from the whole of Europe that grant a degree in physics. It is based on a convention to which institutions are invited to adhere. The scheme aims to allow physics students to spend a mobility period for study in another university (the HOST INSTITUTION) and to ensure that the period is recognized academically when the student returns to his or her HOME INSTITUTION. Students applying must have successfully completed at least the first year of undergraduate studies (normally also the second). The mobility period is typically for one semester or one academic period. (*: Regional Coordinator; *: Programme Coordinator)

Professional Qualifications

The designation *European Physicist* (abbreviated as *Eur Phys*) is a new qualification for physicists which may be used by those listed on the European Register of Physicists. Admission to the Register is decided by the Register Commission reporting to the Council of EPS. Applications for admission are made to, and evaluated by, the European Regional Monitoring Committee established by the Commission. Applicants are asked to show that they have successfully completed appropriate education and experience extending over at least seven years which includes at least three years' acceptable university education in physics or a related discipline and at least two years' post-graduation experience in a responsible position (the experience may include training) involving physics or a related discipline.

EPS Divisions

*: co-opted; †: ex officio; °: invited
‡: Observer; #: Correspondent

The scientific activities of EPS are organized through Divisions and Interdivisional Groups. Participation is open to Individual Ordinary Members as well as to National Society Members (members of national physical societies that belong to EPS) who have indicated that they wish to belong to a Division or Group (generally by notifying their society). The Divisions and Groups are governed by Boards elected from members and some Divisions have Sections representing focussed interests.

National Member Societies

A total of 36 national physical societies are EPS National Member Societies. Their approximately 70 000 members can participate in EPS activities and belong to EPS Divisions and Interdivisional Groups as National Society Members. Each member society's annual fee to EPS, as well as the number of copies of *Europhysics News* it receives for distribution to its members (except for Germany and the UK), is based on the number of NSMs in various categories (full member, student, etc.). Each society sends one Delegate to Council and many have representatives in specific EPS bodies. NSMs wishing to join an EPS Division or Group should contact their national society.

EPS Recognized Journals

EPS recognition of journals aims to raise and maintain standards of physics journals published in Europe without penalizing authors from poorer countries by establishing a *modus operandi*. A journal carrying the inscription "Recognized by the European Physical Society" must meet certain criteria regarding, e.g., the activities and character of its Editorial Board and referees. Conformity with the criteria are monitored, and re-examined every five years, by the EPS Action Committee on Publications. Applications should be made by writing to EPS, Geneva.

ISTITUTO NAZIONALE DI FISICA NUCLEARE (INFN)

Post-doctoral fellowships for non Italian citizens in the following research areas:

THEORETICAL PHYSICS (No. 10) EXPERIMENTAL PHYSICS (No. 20)

Applications are invited for one-year fellowships, which will start from September to November 1996.

Fellowships are intended for young post-graduates (candidates must not be more than 35 years old at the time of application). Each fellowship is granted for one year, and may be extended for a second year.

The annual gross salary is LIT 30 000 000, plus travel expenses for a return trip from the home Institution to the INFN Section or Laboratory. Lunch tickets will be provided during work days.

Candidates should submit an application form and statement of their research interests, including three letters of reference.

Applications should reach INFN not later than **30 November 1995**.

A decision will be taken and candidates informed by the end of April 1996.

The successful applicants may carry on their research in Italy, at any of the following Laboratories and Sections of INFN:

National Laboratories of Frascati (Rome), National Laboratories of Legnaro (Padua), National Southern Laboratories (Catania), and National Gran Sasso Laboratory (L'Aquila).

INFN Sections in the universities of:

Turin, Milan, Padua, Genoa, Bologna; Pisa, Rome "La Sapienza", Rome II, Naples, Catania, Trieste, Florence, Bari, Pavia, Perugia, Ferrara, Cagliari, Lecce, and National Institute for Health (Rome).

Enquiries, requests for application forms, and applications should be addressed to: Fellowship Service - Personnel Office, Istituto Nazionale di Fisica Nucleare (INFN) - Casella Postale 56 - 00044 Frascati (Roma) - Italy.
