

## JOURNAL EXCHANGE

## East and Central European Journals

The exchange of physics journals is extremely important for east and central European countries as it provides a relatively inexpensive means to acquire foreign publications. The east and central European journals listed below have undertaken to ensure that copies of journals received from outside their respective countries will be made available to the physics community at large (generally by keeping the journals in a centrally located and easily accessible library).

Publishers of physics journals are encouraged to initiate or extend exchange arrangements by contacting the offices listed in the table on the right. Further details can be obtained from the editors of the journals.

## EC Documents

## Programme Calls

The full texts of the latest (15 December 1995) three-monthly advance notices and calls for proposal and expressions of interest in a number of European Union 4th Framework programmes can be downloaded from the European Commission's (EC) *CORDIS Document Library*. Calls normally have a three-month response time. Included are (<http://www.cordis.lu/>):

- ESPRIT, Training & Mobility of Researchers, BRITE/EURAM, Stan-

- dards, Meas. & Testing (calls);
- JOULE/THERMIE non-nuclear energies (adv. notice of call);
- INNOVATION networks of organizations for promoting energy technologies and for disseminating and optimizing the results of research and technological development (RTD) activities (calls);
- ENV 2C study courses and training grants for RTD in environment and climate (call);
- INCO list of persons and organizations to assist the EC in the RTD programme, including cooperation with third countries and international organizations (call for

- expressions of interest);
- TSER list of potential contractors to carry out tasks for the European Technology Assessment Network (call for expressions of interest).
